EV - M

THE FLEXIBLE STRONG

Water cooled EV-M for harsh processes
and reduced emissions

The EV-M with its multi-stage lobe design is ideally used for harsh duty applications. It has a higher H₂ pumping speed compared to screw type vacuum pumps. Additional energy savings due to the idle mode. Powerful with low energy demands.

BENEFITS

- High energy saving
- At point heating
- Multi-stage lobe design
- High flexibility
- Intelligent control system
- Small footprint to save fab space

Models	EV-M20N	EV-M102N	EV-M202N	EV-M302N	EV-M502N	EV-M802N	EV-M1205N	
Pumping speed in l/min	1,800	10,000	20,000	30,000	50,000	80,000	11,000

EBARA is a worldwide leading global manufacturer of vacuum and semiconductor systems used in the production of wafers, liquid crystals, solar cells and other products requiring advanced technology.

EBARA supports

EBARA Precision Machinery Europe (EPME) is part of the Japanese EBARA Group and employs approximately 150 people in Europe. The portfolio includes dry and turbo molecular vacuum pumps as well as gas abatement systems. In addition, EPME sells state-of-the-art CMP tools, wafer bevel polishing and substrate coating systems. In Europe, EPME has a central warehouse and an overhaul centre for vacuum pumps.
